ELSEVIER

J. Biochem. Biophys. Methods 32 (1996) 199–200

JOURNAL OF
biochemical and
biophysical
methods

Contents of Volume 32

No. 1
Information for Contributors v

D.A. Cowan and R.M. Daniel (New Zealand, UK)
Rapid purification of two thermophilic proteinases using dye-ligand chromatography 1

P.F. Zatta (Italy)
A new bioluminescent assay for studies of protein G and protein A binding to IgG and IgM 7

E. Boschetti, P. Girot, L. Guerrier and P. Santambien (France)
Quantification and in vitro toxicity studies of extractable chemicals from synthetic ion exchangers 15

N. Parthasarathy, I.J. Goldberg, P. Sivaram and W.D. Wagner (USA)
Isolation of heparin-derived oligosaccharides containing 2-*O*-sulfated hexuronic acids, by lipoprotein lipase afffinity chromatography 27

R. Komsa-Penkova, R. Spirova and B. Bechev (Bulgaria)
Modification of Lowry's method for collagen concentration measurement 33

H.C.F. Oliveira and E.C.R. Quintão (Brazil)
'In vitro' cholesteryl ester bidirectional flow between high-density lipoproteins and triglyceride-rich emulsions: effects of particle concentration and composition, cholesteryl ester transfer activity and oleic acid 45

H. Eickhoff, E. Birch-Hirschfeld, J. Scheef, C. Hoyer, K.-H. Drexhage and K.-O. Greulich (Germany)
Sequence verification by hybridisation with fluorescent octanucleotides as a first step to a fluorescent sequencing by hybridisation protocol 59

No. 2
Research Articles
T. Seya, M. Matsumoto, M. Hatanaka, M. Okada, T. Masaki and K. Iida (Japan)
Rapid purification of human complement receptor type 1 (CD35, CR1) 69

C.A. Mizzen, N.J. Cartel, W.H. Yu, P.E. Fraser and D.R. McLachlan (Canada)
Sensitive detection of metallothioneins-1, -2 and -3 in tissue homogenates by immunoblotting: a method for enhanced membrane transfer and retention 77

K. Vorauer, F. Steindl, A. Jungbauer, R. Hahn and H. Katinger (Austria)
Cytokine activity assay by means of proliferation measured in plane convex microtiter wells 85

E.-B. Yang, D.-F. Wang, P. Mack and L.-Y. Cheng (Singapore)
Detection of EGF-induced EGF receptor degradation and tyrosine phosphorylation in intact cells 97

L. Capelli, S.V. Ermakov and P.G. Righetti (Italy)
'Tunable' positive and negative surface charges on a capillary wall: exploiting the Immobiline chemistry 109

W.A. Prütz (Germany)
Measurement of copper-dependent oxidative DNA damage by HOCl and H_2O_2 with the ethidium-binding assay 125

No. 3
Research Articles
T. Cserháti (Hungary)
Evaluation of HPLC retention data by non-linear mapping, cluster analysis and varimax rotation. A comparative study 137

J. Wegener, M. Sieber and H.-J. Galla (Germany)
Impedance analysis of epithelial and endothelial cell monolayers cultured on gold surfaces 151

M. Adami, I. Zolfino, S. Fenu, D. Nardelli and C. Nicolini (Italy)
Potentiometric alternating biosensing system for in continuum toxicity tests on cell population 171

E.G. Janzen, M.S. West, Y. Kotake and C.M. DuBose (USA)
Biological spin trapping methodology. III. Octanol-water partition coefficients of spin-trapping compounds 183

H. Böttcher and P. Fürst (Germany)
A new microcatheter enables microcalorimetric assessment of thermogenesis after stimulation in cell cultures 191
